

ELearning Modules

We now have all 6 new eLearning modules on the [Learning Management System](#).

Please see below information about each module:

Medical Devices - This course explains the regulations and considerations for clinical investigations or other research studies of medical devices across the UK. It is aimed at those involved in designing or undertaking, supporting or reviewing such research. It does not aim to cover the requirements for manufacturers of medical devices.

Use of the HRA Schedule of Events – This course explains the HRA Schedule of Events. The Schedule of Events is used to support the set-up of non-commercial studies in the NHS in England.

Research involving participants lacking mental capacity – This course explains the regulations and considerations relating to mental capacity and research. It is aimed at those involved in designing or undertaking, supporting or reviewing research, and takes account of research seeking to include adults lacking capacity as well as research where some participants may lack capacity or lose capacity.

Research involving exposure to ionising radiation – This course explains the regulations and considerations for research involving ionising radiation. It is aimed at those involved in designing or undertaking, supporting or reviewing such research.

Research involving human tissue – This course explains the regulations and considerations for research involving human tissue. It is aimed at those involved in designing or undertaking, supporting or reviewing such research. It was in an email about the Radiation Module but she was talking about Human Tissue in it

Confidentiality and information governance consideration in research - This course explains the legislation and information governance considerations relating to use of personally identifiable data in health research. It is aimed at those involved in designing or undertaking, supporting or reviewing such research. We have tried to use the language relating to use of health data proposed by the Understanding Patient Data initiative <https://understandingpatientdata.org.uk/>. This course does not cover the requirements of the General Data Protection Regulation that will come into force in May 2018. The HRA will publish guidance to support preparation for the implementation of the new legislation for health research.

We also have modules on Commercial, Non-Commercial studies and Reviewing the Research Design of Clinical Trials.

All modules can be access via the Learning Management System - <http://elearning.hra.nhs.uk/>. They can be accessed as a guest user which means you don't have to register for an account. However you will not receive a certificate at the end of the module. If you would like a certificate on completion, please do register for an account.

**Health Research
Authority**

If you have any queries or would like to discuss the content of any of these modules with us, please email us at hra.training@nhs.net.
